

★ Financial function &

#) $PMT \Rightarrow$ payment terms

#) $PPMT \Rightarrow$ per month principal amount

#) $IPMT \Rightarrow$ Interest amount in payment Terms

#) Syntax &

$$= PMT(rate, nper, pv, [fv], [type])$$

(syntax)

To find
Total &

ALT + = : SUM
Then

nper & Number of periods

pv & principal value

$$\Rightarrow = PMT(C2/12, C4, -C3)$$

[type]

0 $\rightarrow$ end of period

1 $\rightarrow$ beginning of period

$$\Rightarrow = PPMT(rate, per, nper, pv, [fv], [type])$$

$$\Rightarrow = IPMT(rate, per, nper, pv, [fv], [type])$$

$$= IPMT(\$C\$2/12, E2, \$C\$4, -\$C\$3)$$
